TAS Compensation

Hi, I want to introduce you to the pre-launch of the abundance system, and this is going to launch on the 1st of November. You've got between now and then to get as many people into your team as you possibly can, and you could be in for a big payday on the 1st of November. It's going to cost $6, and that will be required by the 1st of November, and it's a monthly cost.

Now, if you refer two people and your team will refer two people, this is how it will fill out, because it's a matrix. It's unlimited width and five levels deep, and you earn a dollar for every person in your matrix. So, on your 1st level, if you've referred two, you would have the two that you've referred, and when your team, those two refer two, that would give you four on level two.

And as this duplicates down, everybody getting two, you can see that that would go to eight, 16, and 32 on level five. And that would give you total members in your team of two plus four, six, by the time you've filled level two, 14 by the time you've filled level three, 30 by the time you've filled level four, and 62 in total by the time you've filled level five. Your cost is $6, and we are going to deduct $5 from your first five sales on level three to put you into the traffic rotation, so that everybody will go into this traffic rotation once they've got five people on level three.

And that traffic rotation is going to send people to your opt-in page. We can't guarantee results from the traffic. We're hoping that everybody will get one person at least per month on average from the traffic, but we can't guarantee anything.

You might get nobody in a month. You might get nobody for two months. You might get two or three people in a particular month.

It will vary, and we can't guarantee anything, but everybody will be getting traffic once they've got five people in their third level. And we deducting the $5 for that. So your total cost by the time you've got down here is the $11.

So that 14 members, unless you're $11, is giving you a $3 profit. When you've only got two people, you're $4 out of pocket. When you've got six people, you're breaking even.

As soon as you've got over six people, you're starting to get into profit, but the first $5 of that profit will be used to provide traffic for you, regardless of whether you do anything or not. So that would give you $3. And that's why it's $51 net profit with everybody getting two.

You can't control what your team are going to do. You can control what you're going to do. You may say, I'm going to go out and I'm going to bring in 10 people instead of just two people.

And that would mean that you would have a net profit then of $299. But let's go back to that too and assume that you've got down here and you've got that traffic. And it does get you one person on average every month.

Once again, we can't guarantee that. But if it did, that would go up to three. And your income then is looking at $82 a month.

And when your team get down here as well and they go up to three, that's going to push your income up again and you're now on $352. And of course, that's going to happen every month. So the next time, that's four people.

473. And when they get there all up to four, you're over $1,000. And then you go to five and that's more money.

And they go to five and that's more money. And you're getting up here now to every time in income. And when you go to six, that's getting on for $5,000 a month.

And most people can retire on that. And when your team goes to six, you're looking at over $9,000 a month. A lot of this will happen automatically.

We can't guarantee a time level for it. The ambitious people are going to go out and say, okay, I'm going to get my six. I'm going to get 10.

And I'm going to encourage my team to go out and get at least five. And that's 7,000. What if they don't do that? What if they only get four? You're still on that $3,399.

And that is just from this compensation plan. And this compensation plan is only a tiny fraction of what you are going to be making. Now you might say, I'm not good at recruiting.

I don't know how to get my two people. And my team don't know how to get there two people. Within our system, there will be three methods of getting traffic.

We can't guarantee how long it's going to take. But if you use those three methods of getting traffic, they're not going to take up a lot of time. You set them up and you use them.

And over time, you will get your two people or more. There will be multiple income streams that will be generated. But I don't want you to worry about them.

What I want you to do is think purely about this because this drives everything. This $6 is going to pay for something that every online market needs and uses. And not just something, many things.

Tools that help every online marketer become profitable. The value of this is at least ten times what is being paid. $60 would be cheap for what we are going to provide everybody with.

But it's only going to be $6. This is why you're going to find it easy to get your two. Once people see the compensation plan and the products that they're getting, people will be flocking in.

You will find it very simple to get two people. And your team will find it very simple to get two people as well. Get in pre-launch now.

Get as many people registered as you can. They register free. They'll get into the system free.

And when we launch on November the 1st and everybody upgrades and pays their $6. If you've built a team, you could be in for a huge payday straight away November the 1st. Do it now.

God bless.
