# joy

Hi, I want to welcome you to the abundance system and that's the short name for the simple easy abundance system for all and I don't want to make this into a sales pitch because it really is a very simple situation. If you join, register and follow the system, it is a fact that you will make money. How much and how quick we can't guarantee that's down to you.

But you will generate income from the system and that income will gradually grow over time. But when we talk about abundance, to me it doesn't mean a lot of money. To me, abundance is being happy, being healthy, being stress free.

Now it's difficult to be stress free and happy all the time if you're struggling for cash. And so the system itself will provide you with the cash but money alone won't make you happy. And you're going to get to the point where you have enough money to do whatever you want anyway.

But you will be generating more income. And it's how you view that and what you do with that that will create the true happiness in your life. So I want you to start thinking now not about how much you're going to make and how you're going to pay your bills and this sort of thing.

Start thinking now about what you're going to do with that cash. I think we all have some sort of passion within ourselves and you may want to save the whales or form a scholarship for disadvantaged children or whatever it may be. I think we all have a passion of some sort and I want to tell you what my passion is and how your involvement in the abundance system is going to make that a reality.

Because what we have here is something that can help millions of people no matter where they're at. There are people that have a lot of money but they're not happy. I have a friend who has a multi-millionaire and at one point in his life he had loads of money but he was so unhappy that he decided to commit suicide.

And he loaded himself up with weights and dropped himself into the swimming pool at his house to drown himself. And he says the last thing he remembered was not a feeling of happiness or joy but a feeling of relief that he was leaving this world. And the next thing he remembered is he woke up on his bed and he was wet and the bed was wet.

And to this day he still doesn't know what happened. As far as he was concerned he killed himself and at first he thought he was waking up in heaven or somewhere but he was actually in bed. And as I say to this day he doesn't know how or why he got there but it changed his view on life.

But he was without hope and so what this program can do for anybody at any level especially for the poor and the despondent. And when I say poor I don't necessarily mean lacking money although that's part of it. I mean poor in attitude to life and we can bring them new hope and we can bring courage to the people that have got to a point where they're really despondent.

And we can stimulate them again and bring that courage so that they have the courage to go forward again and generate more hope again. And we can give strength to the people who thought they were failures. They've tried things time after time after time and none of them worked.

And we can now say well all you've got to do is follow the system and it will work. We can give them renewed strength and on top of all that every time you pay your $6 monthly fee for the auto responder that we provide and the tools that go with it. It depends on how it's paid but it produces between 40 cents and 55 cents in profit.

And that's not much on its own. But as we grow to millions and I mean millions I don't mean a million or we'll struggle to get there. We're going to go to millions of people and with around about 5 million people that would produce over $2 million a month and $2 million a month will build a school for primary children.

And we can fill that school with teachers that can not only teach them the basics of the three hours reading writing and arithmetic but also spiritual values and teach them how to use their mind from an early age to become do and have everything that they want in life and to make this world a better place as they travel on life's journey and that can have a massive impact. And if we're doing that every month that's 12 schools a year and we're going to put these schools in places where there are a lack of facilities and that can be anywhere in the world. But I'm hoping we can probably start in Central America and South America, Africa, Asia.

There are already a lot of schools in India that are doing this sort of thing but we can spread that globally. And your $6 a month contribution in addition to it creating you being that the foundation of your newfound wealth and abundance it will go towards helping us to create that reality from the dream that it currently is. Your own personal abundance will grow and you'll have more than enough and without more than enough you will also be able to do things.

This is an unprecedented opportunity to gain real abundance not just financial abundance because once you have covered your basic needs you'll find that the stress from your life has been eliminated and with the elimination of stress you'll find that sickness, illness, disease will evaporate from your life as well. So you'll have a healthy life and you'll be able to have a happy life knowing that you're doing good. Happiness comes mainly from what we give and what we get back is unlimited joy and that can all be yours starting today.

God bless.
